Details of the Post - UI Designer (Full Stack Developer) /EC/UI/02

Job Title & Code:	UI Designer (Full Stack Developer) / EC/UI/02	Job Category:	Contract Basis - Consolidated
Location:	Pune	Travel Required:	Yes
No of Post	01	Position Type:	Full Time

Job Description

Role and Responsibilities

- Design and implementation of the overall architecture of the web and mobile application.
- Participating in the design and creation of scalable software viz. writing clean, functional code on the front- and back-end
- Ensuring the entire stack is designed and built for speed and scalability, maintain quality and ensure responsiveness of applications.
- Collaborate with the rest of the engineering team to design and launch new features.
- Design and implementation of continuous integration and deployment.

Qualifications and Experiences

- BE / B. Tech / MCA / M.Sc.(IT/CS) in Computer Science & Engineering / Information Technology / Electronics & Telecommunication Engineering/ Mobile Computing with minimum two years of post-qualification experience.
- Persons with relevant experience shall be given preference.

Required Skill Set

- Proven experience as a full stack developer or similar role
- Experience of UI Design for desktop and mobile applications
- Knowledge of multiple front-end languages and libraries (e.g. HTML/ CSS, JavaScript, XML, jQuery)
- Knowledge of multiple back-end languages (e.g. C#, Java, Python) and JavaScript frameworks (e.g. Angular, React, Node.js)
- Familiarity with databases (e.g. MySQL, MongoDB), web servers (e.g. Apache) and UI/UX design

Desirable Skill Set

- Writing UI Design, HTML, CSS, and JavaScript. Being up on latest practices is a must, e.g., HTML5, CSS3, JQuery, Angular-JS, Java Script etc.
- A relevant UI design & back-end programming language e.g., PHP, JavaScript, Python, Ruby etc.
- Database design and management, including being up on the latest practices and associated versions.
- Familiarity with a relevant and globally supported framework – both front-end and back-end.
- Work across multiple teams with Android developers, Hybrid developers and Server side developers to develop solutions to securely transfer data between the native mobile app and the middleware.
