

Approach and Methodology to be adopted for e-Kranti are as follow:

- i Ministries / Departments / States would fully leverage the Common and Support ICT Infrastructure (e.g. GI Cloud, National / State Data Centres, Mobile Seva, State Wide Area Networks, Common Services Centres & Electronic Service Delivery Gateways). DeitY would also evolve/ lay down standards and policy guidelines, provide technical and handholding support, undertake capacity building, R&D, etc.
- ii The existing/ ongoing MMPs would also be suitably revamped to align them with the principles of e-Kranti. Scope enhancement, Process Reengineering, use of integrated & interoperable systems and deployment of emerging technologies like cloud & mobile would be undertaken to enhance the delivery of government services to citizens.
- iii States would be given flexibility to identify, for inclusion, additional state-specific projects, which are relevant for their socio-economic needs.
- iv e-Governance would be promoted through a centralised initiative to the extent necessary, to ensure citizen service orientation, interoperability of various e-Governance applications and optimal utilisation of ICT infrastructure/ resources, while adopting a decentralised implementation model.
- v Successes would be identified and their replication promoted proactively with required customisation wherever needed.
- vi Public Private Partnerships would be preferred wherever feasible to implement e-Governance projects with adequate management and strategic control.
- vii Adoption of Aadhaar based ID would be promoted to facilitate identification and delivery of benefits.
